Marketing Campaign Performance Dashboard

Project Documentation

An Excel-based analysis of digital marketing performance across channels, regions and time periods, built with formulas, PivotTables, PivotCharts and slicers.

Item	Detail
Tool	Microsoft Excel / WPS Office
Workbook	MARKETING_CAMPAIGN_PERFORMANCE_ANALYSIS.xlsx
Campaigns analysed	500
Date range	10 Dec 2024 - 10 Jun 2025
Channels / Regions	5 / 4

1. Project Overview

The Marketing Campaign Performance Dashboard evaluates how digital campaigns perform across **channels, regions and months**. Campaign-level data is turned into calculated metrics, PivotTables, charts, KPI cards and interactive filters so that a marketing team can see what is working and where budget should go.

Business objectives

- Monitor campaign performance across channels and regions.
- Compare spend, revenue, profit and conversions.
- Measure efficiency with CTR, CPC, CPA, ROAS and Profit Margin.
- Analyse performance over time.
- Identify high-performing and under-performing channels and regions.
- Support budget decisions with an interactive dashboard.

2. Dataset

The dataset holds 500 campaigns. Each record has a campaign ID, date, channel, region, budget, spend, impressions, clicks, conversions and revenue.

Item	Value
Campaigns	500
Channels	Facebook, Google Ads, Instagram, LinkedIn, Twitter
Regions	East, North, South, West
Total budget	$3,311,673.01
Total spend	$3,132,508.19
Total revenue	$6,552,948.08
Total profit	$3,420,439.89
Impressions / Clicks / Conversions	62,386,067 / 1,814,121 / 184,526

3. Data Preparation

- Reviewed the structure and data types of the dataset.
- Checked for duplicates: none found (500 unique campaign IDs).
- Checked for missing values: none found in the 500 records.
- Standardised date, number and currency formats.
- Added calculated KPI columns and a Year-Month field.
- Built PivotTables for channel, region, monthly and conversion analysis.

Note: the Cleaned Data sheet has a few blank rows below the 500 records. They are not campaigns and are excluded from the analysis.

4. Calculated Metrics

Metric	Formula	Purpose
CTR	Clicks / Impressions	Click engagement
CPC	Spend / Clicks	Cost per click
CPA	Spend / Conversions	Cost per conversion
ROAS (campaign)	Revenue / Spend	Return on spend for one campaign
ROAS (aggregate)	SUM(Revenue) / SUM(Spend)	Used for all channel, region, month and KPI results
Profit	Revenue - Spend	Profitability
Profit Margin %	Profit / Revenue	Profit as a share of revenue
Year-Month	TEXT(Date, "yyyy-mm")	Monthly trend analysis

Overall KPI	Result
CTR	2.91%
CPC	$1.73
CPA	$16.98
ROAS	2.09
Profit margin	52.20%
Budget utilisation	94.59%
Unused budget	$179,164.82

5. Workbook Structure

Sheet	Purpose
Raw Data	Original campaign dataset
Cleaned Data	Cleaned data with KPI columns
PivoteTables	Seven PivotTables feeding the charts (sheet name spelled as in the workbook)
DashBoard	KPI cards, five PivotCharts and slicers

6. Dashboard Components

KPI cards

- Total Spend, Total Revenue, Total Profit
- ROAS (aggregate: Total Revenue / Total Spend = 2.09)
- Total Conversions

Visuals

- **Spend vs Revenue Over Time** (line chart): shows where revenue grows faster or slower than spend.
- **Channel-wise ROAS** (bar chart): shows return on spend per channel.
- **Region-wise Conversions** (bar chart): compares regions by conversions.
- **Budget Allocation by Channel** (pie chart): shows how budget is shared.
- **Campaign Performance by Channel** (clustered column): impressions, clicks and conversions per channel.
- **Campaign Conversion Funnel**: Impressions (62,386,067) to Clicks (1,814,121) to Conversions (184,526). Confirm this visual is present on the dashboard.

Interactive filters

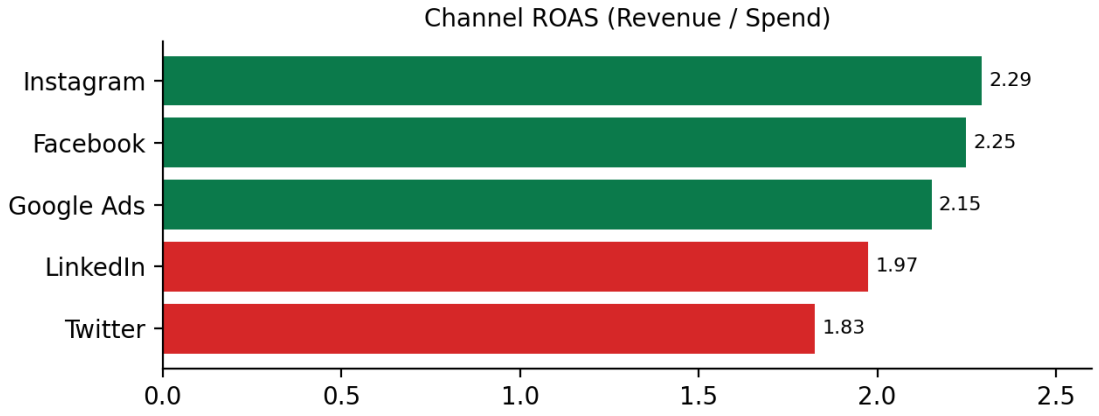

- Channel slicer
- Region slicer
- Year-Month slicer

The slicers are connected to all PivotTables, so every chart and KPI responds when a filter is selected.

7. Results

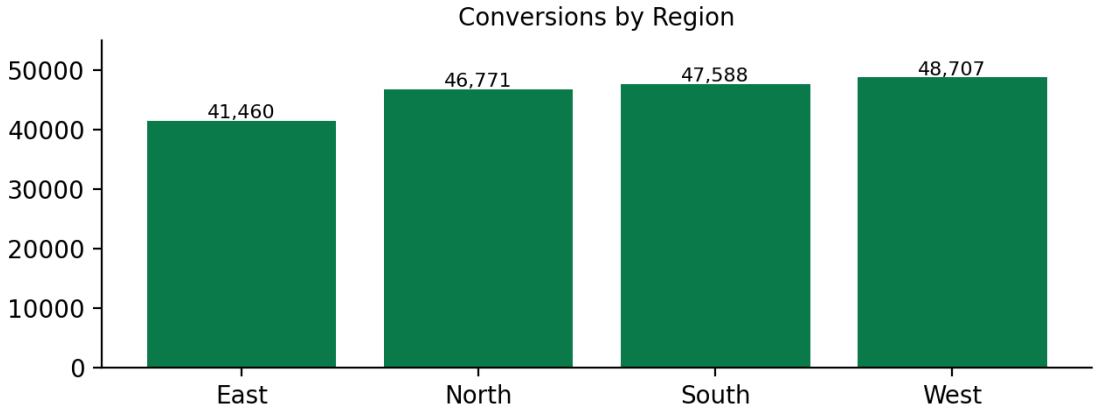

Channel performance

Channel	Spend	Revenue	Profit	Conv.	ROAS	CPA
Instagram	$616,798.73	$1,413,738.00	$796,939.27	39,603	2.29	$15.57
Google Ads	$637,608.50	$1,371,874.68	$734,266.18	38,479	2.15	$16.57
LinkedIn	$652,119.29	$1,287,791.22	$635,671.93	36,570	1.97	$17.83
Facebook	$572,200.11	$1,285,904.93	$713,704.82	35,462	2.25	$16.14
Twitter	$653,781.56	$1,193,639.25	$539,857.69	34,412	1.83	$19.00

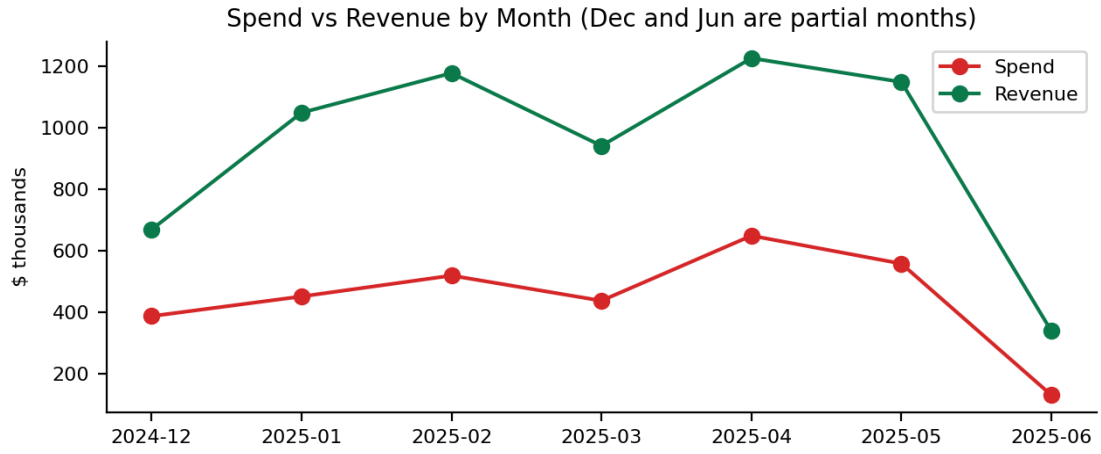

Region performance

Region	Spend	Revenue	Profit	Conv.	ROAS	CPA
West	$810,719.79	$1,752,564.19	$941,844.40	48,707	2.16	$16.64
South	$771,410.08	$1,662,610.72	$891,200.64	47,588	2.16	$16.21
North	$838,675.44	$1,706,679.86	$868,004.42	46,771	2.03	$17.93
East	$711,702.88	$1,431,093.31	$719,390.43	41,460	2.01	$17.17

Monthly performance

Month	Spend	Revenue	Profit	ROAS	Conv.
2024-12	$387,223.67	$669,060.35	$281,836.68	1.73	18,177
2025-01	$451,320.34	$1,049,410.80	$598,090.46	2.33	28,935
2025-02	$519,247.21	$1,178,268.76	$659,021.55	2.27	32,571
2025-03	$437,450.39	$941,547.01	$504,096.62	2.15	26,943
2025-04	$649,014.28	$1,226,839.00	$577,824.72	1.89	36,584
2025-05	$558,132.99	$1,149,303.78	$591,170.79	2.06	32,256
2025-06	$130,119.31	$338,518.38	$208,399.07	2.60	9,060

8. Key Insights

- **Instagram is the strongest channel:** highest ROAS (2.29), revenue, profit and conversions, and the lowest CPA ($15.57).
- **Twitter is the weakest:** lowest ROAS (1.83), highest CPA ($19.00) and a 45.23% profit margin. Review targeting and creative before adding budget.
- **Budget is spread almost evenly** (18% to 21% per channel) although results differ, so allocation could be more performance-driven.
- **West and South are the strongest regions.** West leads on conversions (48,707) and ROAS, with South almost level (2.162 vs 2.155).
- **North has the highest CPA of the regions** ($17.93) despite high volume.
- **Efficiency improved after December:** monthly ROAS ranges from 1.73 (Dec 2024) to 2.33 (Jan 2025) among the full months, with a dip to 1.89 in April.
- **$179,164.82 of budget was unspent** (94.59% utilisation).

9. Recommendations

- Prioritise Instagram, which leads on ROAS, profit, conversions and CPA.
- Review Twitter performance before increasing its budget.
- Keep monitoring Google Ads: second-highest profit ($734,266.18).
- Maintain focus on West and South; review North's cost efficiency.
- Move to performance-based budget allocation instead of near-equal splits.

- Use the slicers to check individual channels, regions and months before budget decisions.

10. Data Interpretation Notes

- **Partial months:** December 2024 starts on 10 Dec and June 2025 ends on 10 Jun (24 campaigns). Their monthly figures are not comparable with full months. June's ROAS of 2.60 must not be read as a full-month result.
- **ROAS calculation:** aggregate ROAS is total revenue / total spend. Do not use the PivotTable default "Sum of ROAS", which adds up campaign values.
- **Close results:** West and South have almost identical ROAS.
- **Filters:** read results together with the active slicer selections.

11. Known Issue and Fix

The Channel-wise ROAS PivotChart originally used "Sum of ROAS" (values around 215 to 248 per channel) and so ranked LinkedIn above Facebook. The correct ranking by aggregate ROAS is Instagram 2.29, Facebook 2.25, Google Ads 2.15, LinkedIn 1.97, Twitter 1.83.

To fix in Excel:

- Select the Channel ROAS PivotTable (PivoteTables sheet, B30:C36).
- Go to PivotTable Analyze > Fields, Items & Sets > Calculated Field.
- Name it ROAS_Agg and use the formula ='Revenue ($)'/'Spend ($)'. Click Add, then OK.
- Remove Sum of ROAS from Values and add ROAS_Agg, formatted to 2 decimals.
- If the ROAS KPI card reads from the first PivotTable (B3:G9), point it to ROAS_Agg as well.

12. Project Workflow

Raw data > Data understanding > Cleaning > Calculated KPI columns > PivotTables > PivotCharts > Dashboard with slicers > Insights > Recommendations.

13. Conclusion

The 500 campaigns generated $6,552,948.08 in revenue and $3,420,439.89 in profit from $3,132,508.19 of spend, an overall ROAS of 2.09. Instagram is the strongest channel and Twitter needs the most attention; West and South are the strongest regions. The dashboard lets users move from top-level KPIs to channel, region and monthly detail to support budget decisions.
